

# INTEGRATED ENGINEERING SOLUTION

## IES Maintenance App

Your annual maintenance tasks, simplified. IES Maintenance App eliminates the paperwork through digitization, so you can spend less time on tracking documents and more time getting things done.

### Interactive Work Orders

Get a full picture of what's working and what is under maintenance in the infrastructure, and who is in charge of the task and a timeline of specific works. Assign tasks to our experienced technicians to fulfil routine preventive maintenance works.

All Task	Pending	Outstanding	Active	No Show	Assigned	Waiting for Review	Completed	Deleted Items
101	101	102	103	104	105	106	107	108

### Traceable Record

All Project Record	Deleted Items						
101	102	103	104	105	106	107	108

Maintenance records are safely stored in our database, showing essential data with a full maintenance log showing person in charge, equipment health status, down time and tasks involved. The record can be retrieved at anytime to track previous maintenance work.

Based on the records, the system will alert corresponding technicians before the next maintenance work is due for planning and logistics purposes, minimizing any operational disruptions.

## LEAN Operation

Digitizing labour and resource intensive maintenance procedures so there is not need to shuffle between papers to get the information you need. Simply input data and comments into the IES Maintenance App during the maintenance work by the technician, eliminates the loss of information and users are able to retrieve real time data to make informed decisions.
